Benefits of Good Biosolids Management

You are invited to attend a four-hour workshop to hear about new techniques to improve and fine-tune your wastewater and biosolids programs. All agencies, no matter what size, can benefit from using sustainable practices.

The Northwest Biosolids Management Association (NBMA), Evergreen Rural Water of Washington (ERWoW), Oregon Association of Water Agencies (ORACWA) and Pacific Northwest Clean Water Association (PNCWA) are partnering with National Biosolids Partnership (NBP) in a program to assist municipal agencies in the Pacific Northwest to prepare a biosolids management system.

A continual improvement system can help you manage regulated and non-regulated issues that can otherwise result in public challenges for local biosolids programs.

Come and learn how you can get involved and receive free training and consulting services to prepare and implement your management system.

Class Outline

Class Starts at 10:00am and will be over by 3:00pm

10:00am - 12:00pm

- Tools to make your organization more efficient and responsive
